

BEST SPEAKERS OVER \$3,000

► Bowers & Wilkins 802D \$22,000

We think this behemoth of a speaker is still king of the castle of full-sized speakers. Sure, you need the dollars behind you to bring this king home, but rest assured, it is worth the cash. These speakers have been awarded by *SmartHouse* many times over, and the reason is that they continue to stand out in terms of sheer audiophile performance.
